Bottlecaps (CAPS) Whitepaper – v1.0

Authored By: Wyley Gump & Jamie Boggs

04/20/2025

Introduction

Welcome to **Bottlecaps (CAPS)** — a decentralized, GPU-mineable meme coin forged in the radioactive spirit of the Fallout universe. Inspired by the post-apocalyptic barter system, CAPS pays tribute to the good old days of grassroots crypto — when mining was accessible, coins were fair-launched, and fun was part of the process.

With **no premine**, **no developer fund**, and **no corporate fluff**, CAPS exists purely to be mined, held, and memed by the community. This is not the next financial revolution — it's a nostalgic rebellion against overengineered crypto projects. A digital bottle cap for the decentralized wasteland.

Purpose

CAPS has a simple mission:

1. Be mineable.
2. Be tradable.
3. Be fun.

There's no pretense of solving global finance. CAPS is for those who remember when anyone with a decent GPU could participate in crypto. It's for the weekend warriors, the basement miners, the meme lovers — the folks who keep the decentralized dream alive, not with VC money, but with hash power and grit.

Technical Specifications

Ticker	CAPS
Name	Bottlecaps
Algorithm	KawPoW (GPU-mineable)
Consensus	Proof of Work
Block Time	60 seconds
Block Reward	50 CAPS (subject to halving)
Halving	Every 1,050,000 blocks (~2 years)
Max Supply	111,000,000 CAPS
Premine	None
Dev Fund	None (10% reserve is community-votable)
Launch Date	TBD
Initial Supply	0 CAPS (mined from genesis block)

Mining

CAPS uses the **KawPoW algorithm**, chosen for its fairness to GPU miners. It ensures that ASICs stay out, and the playing field remains level. Whether you're running a solo rig or joining a pool, mining CAPS should be simple, fun, and rewarding.

Official wallets and mining guides for Windows and Linux will be released via our GitHub and website. If you can game, you can mine.

Tokenomics

CAPS is distributed in a clear and community-first manner:

- **70%** — Mining Rewards

- **30%** — Liquidity Pool (locked on PancakeSwap)

No VC allocations. No whales. No secret backdoors. Just honest distribution and transparent intent.

Community First

CAPS doesn't come with buzzwords like "Web3 synergy" or "AI-powered metaverses." It's a coin that exists to exist. If you want a "serious investment," go elsewhere. If you want a fair-launched, GPU-mineable coin to tinker with, mine, and meme — **welcome to the Wasteland**.

Security & Transparency

Built on a **modified Ravencoin codebase**, CAPS leverages a proven foundation while customizing supply mechanics and branding. The code is:

- **Open Source**

- **Peer-reviewed**

- **Free of backdoors**

All changes are tracked and available on GitHub for full community audit. No contract gimmicks. No rugpulls.

Roadmap

We're not promising the moon. Just solid milestones delivered with grit.

- Launch mainnet

- Release Windows & Linux wallets

- Deploy GitHub repo and seed nodes

- Publish mining guides and pool configs

- Launch official mining pool

- List on PancakeSwap with ~$500 CAPS–BNB liquidity

- Launch themed website with:

    - Faucet

    - Whitepaper

    - Block explorer

    - Wallet links

    - GitHub access

More may come — but only if it makes sense. No fluff.

Inspiration

The **total supply of 111,000,000 CAPS** is a direct nod to **Vault 111** from *Fallout 4* — a symbolic gesture to a world where **bottle caps became currency** after the fall of society.

CAPS is a tribute to that narrative: a digital relic born for the meme economy. If you know, you know.

Legal Disclaimer

Bottlecaps (CAPS) is an independent, community-driven crypto project. While inspired by the use of bottlecaps as post-apocalyptic currency — most notably featured in the *Fallout®* video game franchise — **CAPS is in no way affiliated with, endorsed by, or associated with Fallout, Bethesda Softworks, Microsoft, or ZeniMax Media**.

All references to *Vault 111*, bottlecaps, or related themes are intended as **parody and homage**. This project is built with love and satire, not licensing.

CAPS is open-source, public domain software for meme-loving miners. All trademarks belong to their rightful owners. We claim none. We parody all.

Final Words

This is not a revolution. This is not a promise of riches. This is Bottlecaps — a mineable meme on a mission to bring the **fun** back to the blockchain.

Grab your pickaxe. Fire up your GPU. And welcome to the digital Wasteland.

Stay radioactive.
